

## ReadMe File

### Steps to load extension into Google Chrome:

1. Retrieve project files from GitHub repository.
2. Open Google Chrome.
3. Enter 'chrome://extensions' into browser search bar.

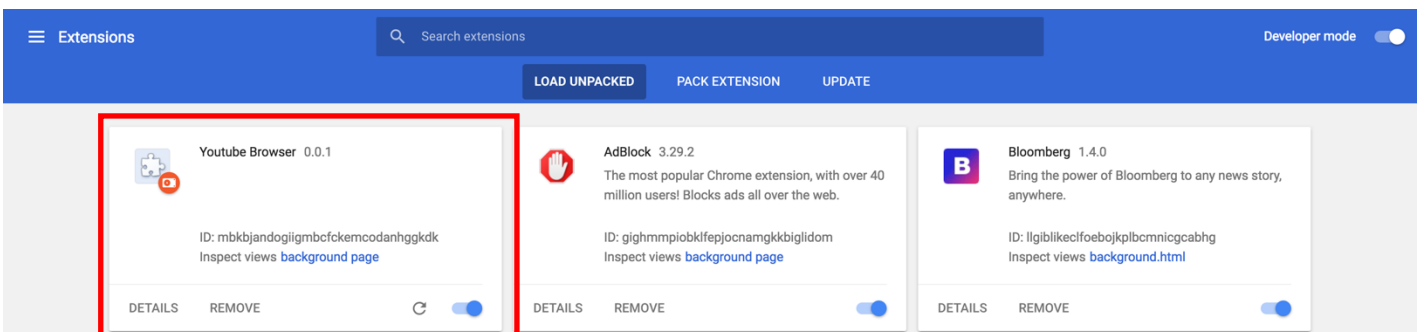

4. Click 'Developer mode' radio button.

5. Click 'LOAD UNPACKED' link.

6. Navigate to where project files are stored locally and select them.
7. Ensure the associated radio button is clicked for the project extension.

8. The browser should now be functioning.

To view the Chrome developer tools specifically for the background page (background.js) click 'background page' link.
